Foundation for Sight & Sound! Att Mitch

I received your message on my answering machine a couple weeks ago and left you a message then my son received a E mail which I just received. Sorry to be so late writing & "thank" Sight & Sound for my new life.

I had been visiting my family for the holidays when I received the news that I could go to a local Audiology M.D. I went to her on Jan 7 and received my hearing aids on Jan 27. What a difference in my life! I could hear my car motor! Hear the birds at my condo, when I had lived for 7 1/2 yrs & never heard before. So many sounds I'd forgotten. What a sound, I didn't realize I'd forgotten the joy of hearing. I wear them daily & have not had a problem with them. Now I don't have to have people repeat words ^{and} or whole sentences! I buy my batteries at Costco - 40 for \$9.00 they last about 5 days. The Audiology MD said they are as good as any & very reasonable. My battery size is 312. I've had many people say they cannot even tell I wear HA's as they don't show. I'm very happy with them and I thank the foundation very much for their help. I could never get them without their help.
